

Exposure time corrected image

$(\text{image1}/\text{duration1} + \text{image2}/\text{duration2} + \text{image3}/\text{duration3}$
 $+ (\text{image4} + \text{image6})/(\text{duration4} + \text{duration6}) + \text{image5}/\text{duration5})$

4-15 keV, error=0, log scale

Non flaring regions
just exclude target 4 and 6
(target 1, 2, 3 and 5)
4-15 keV, linear scale

all targets
15-100 keV, linear scale
(mainly not focused photons
and charged particles,
maybe correspond to
background distribution)

4-6 keV
log scale

6-8 keV
log scale

8-10 keV
log scale

10-15 keV
log scale
