

FOXSI-2 update

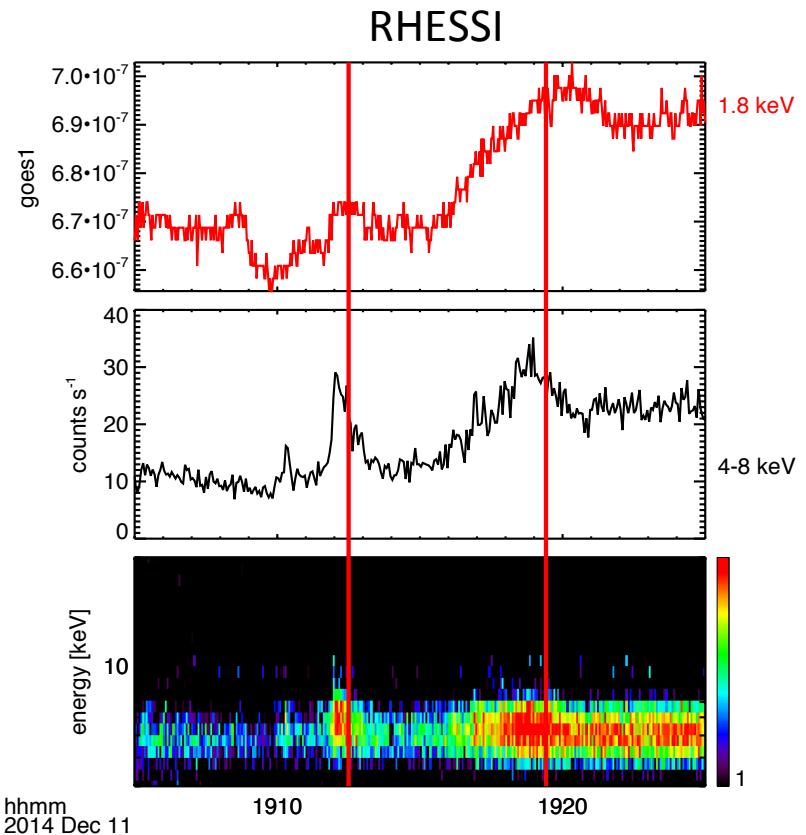

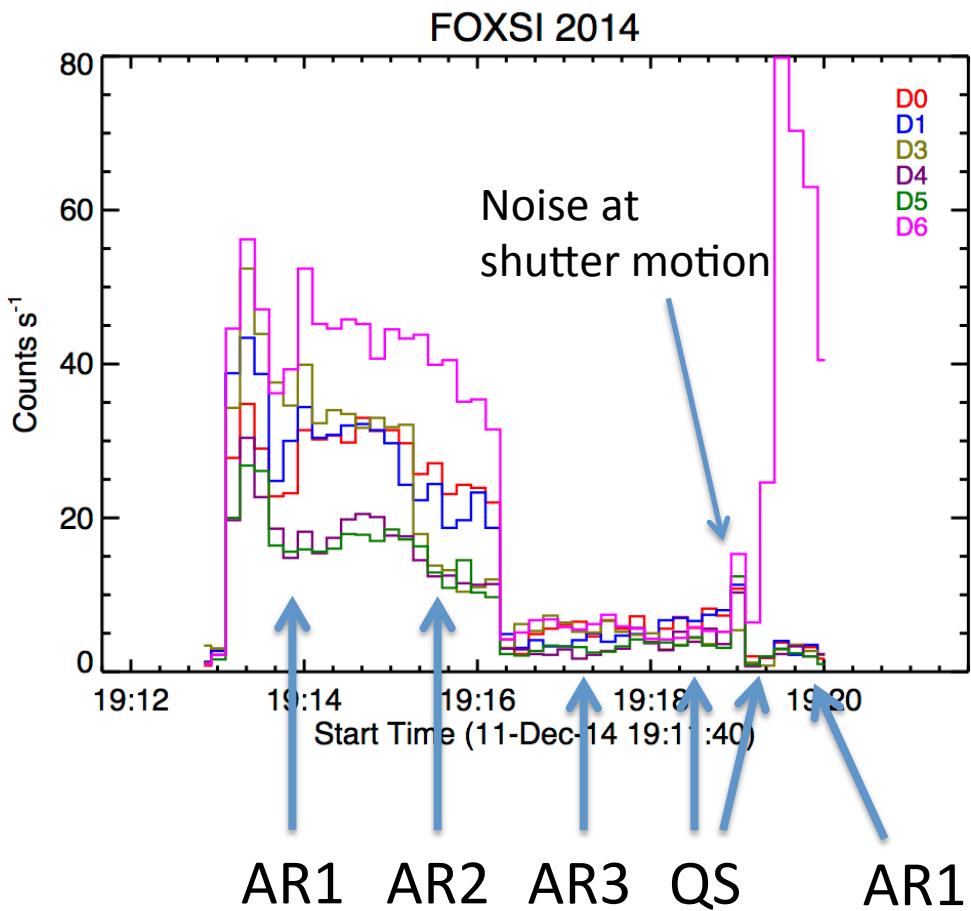

2014 jan 7

Pointing

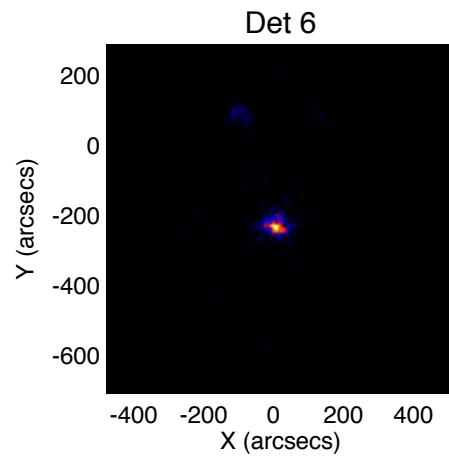

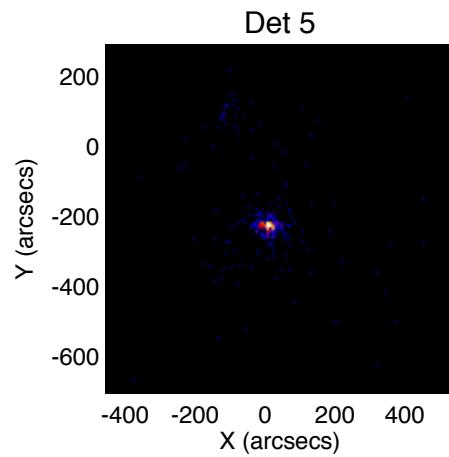

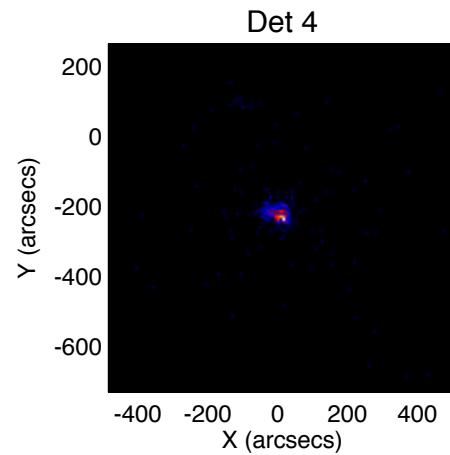

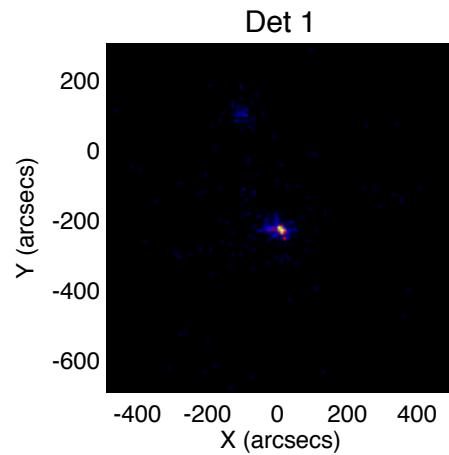

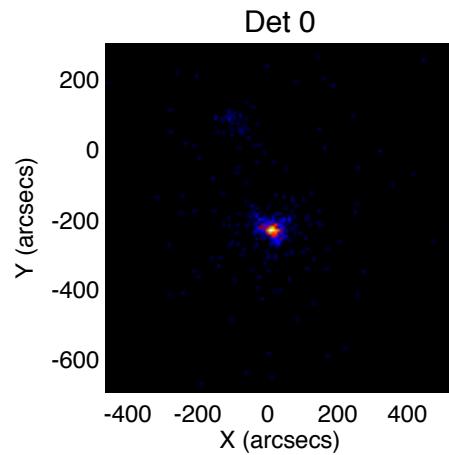

- Sequence (20-100 sec on each):
 - AR1
 - AR2
 - AR3
 - QS1
 - QS1 (shutter in)
 - AR1 (shutter in)

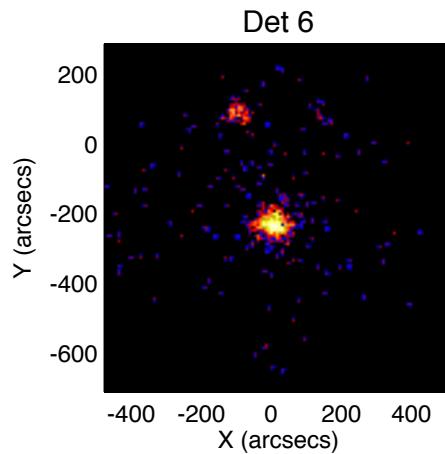

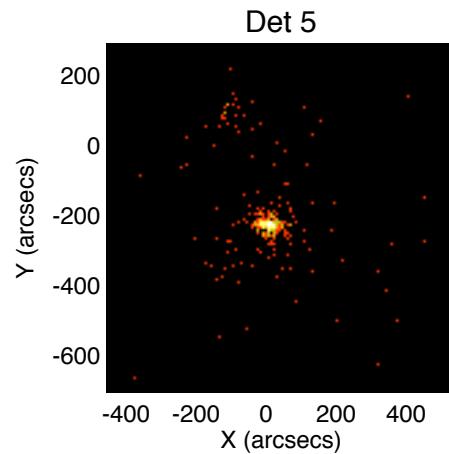

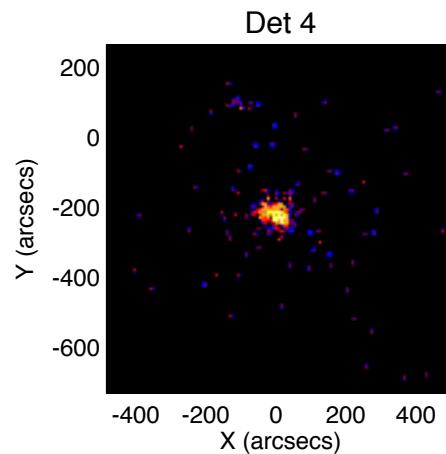

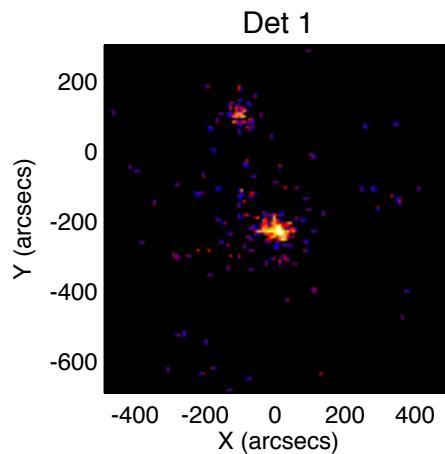

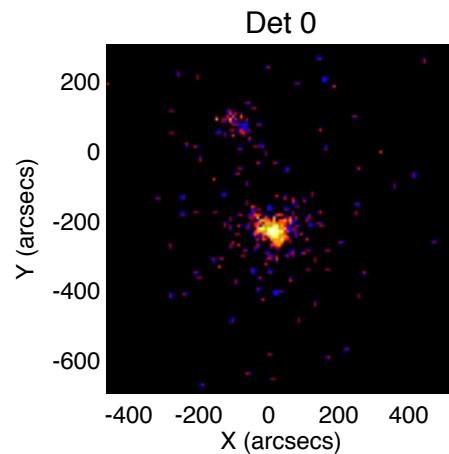

Time profile

Target 1 (linear)

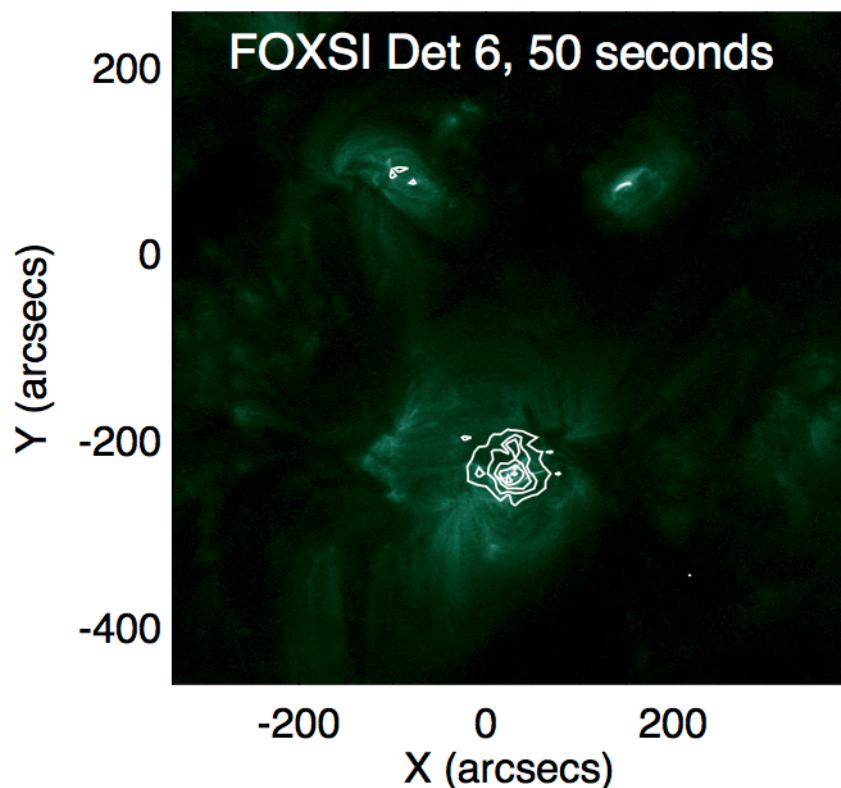

Target 1 (log)

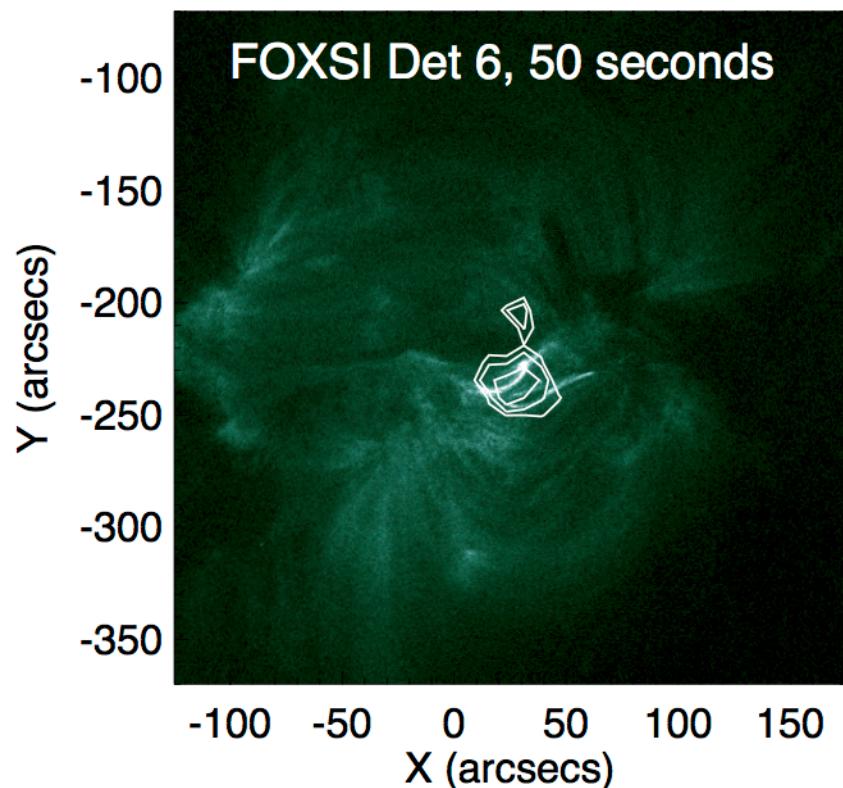

AR1, with AIA 94A

- Sources are lined up by eye.

AIA 94 11-Dec-2014 19:13:01.120

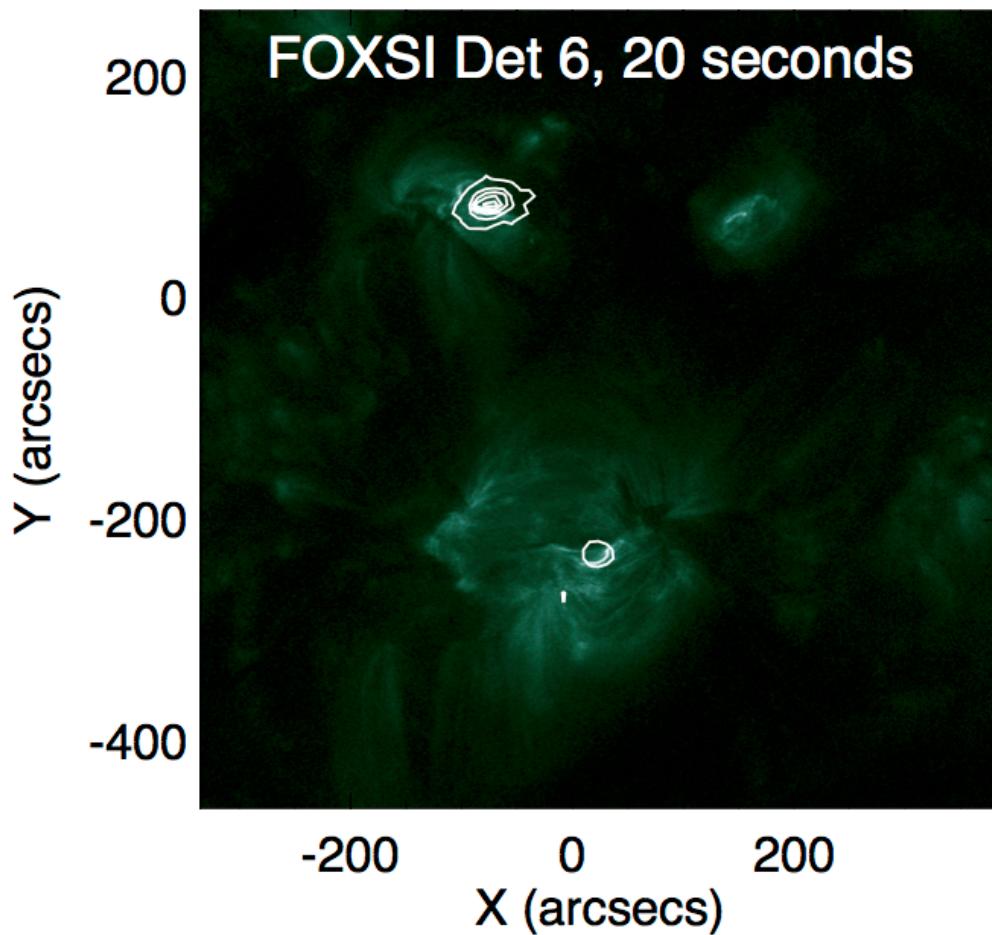

AIA 94 11-Dec-2014 19:13:01.120 UT

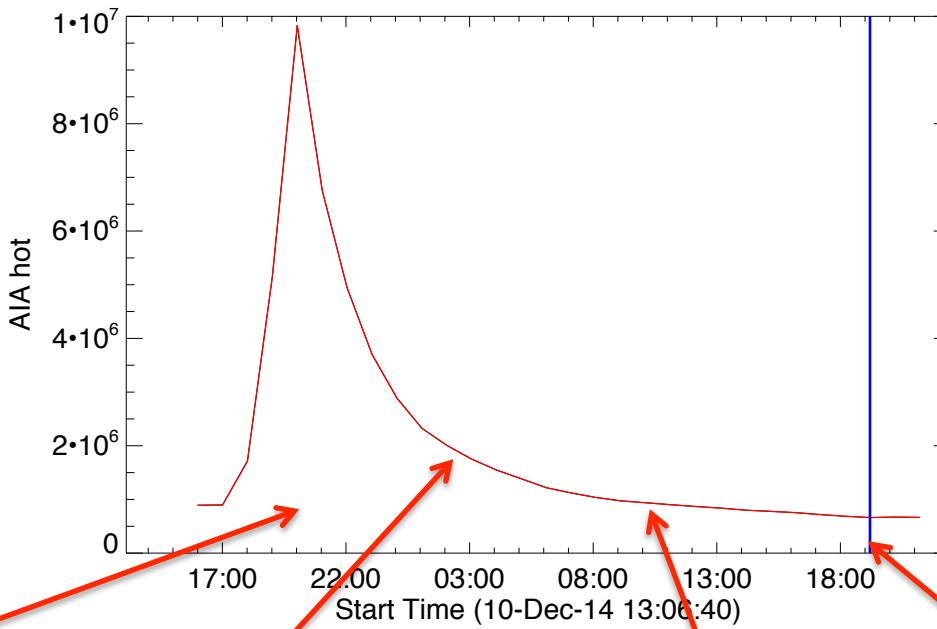

- Note the angry monkey face.

Last target, with AIA 94

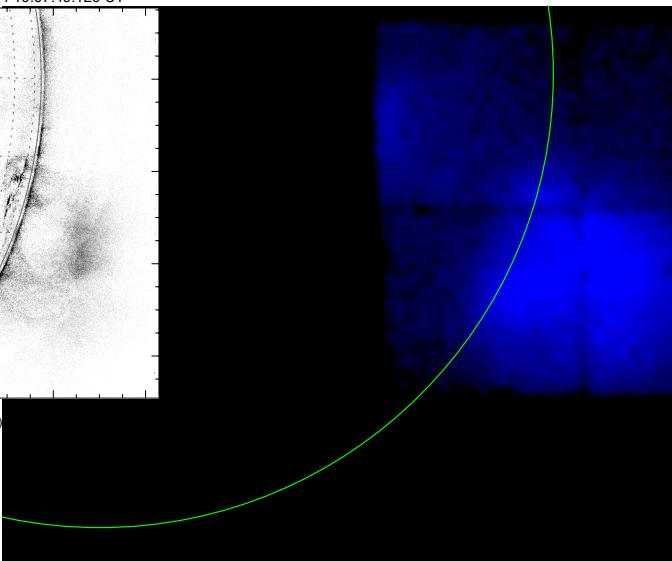

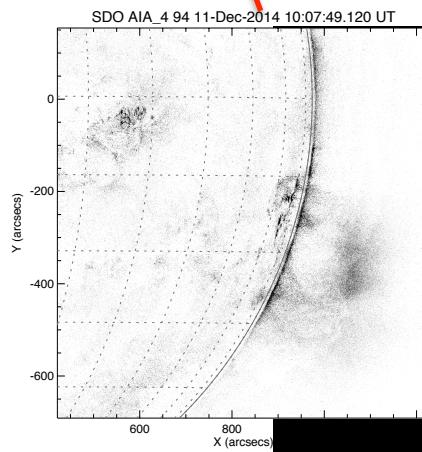

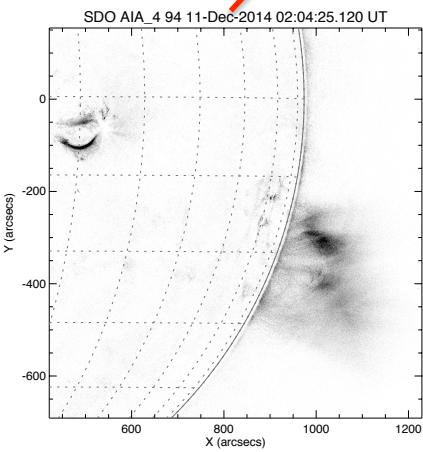

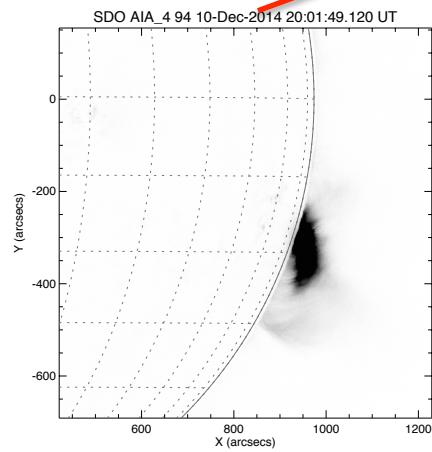

AIA 94 11-Dec-2014 19:19:01.120 UT

Decaying limb flare and NuSTAR/FOXSI observations

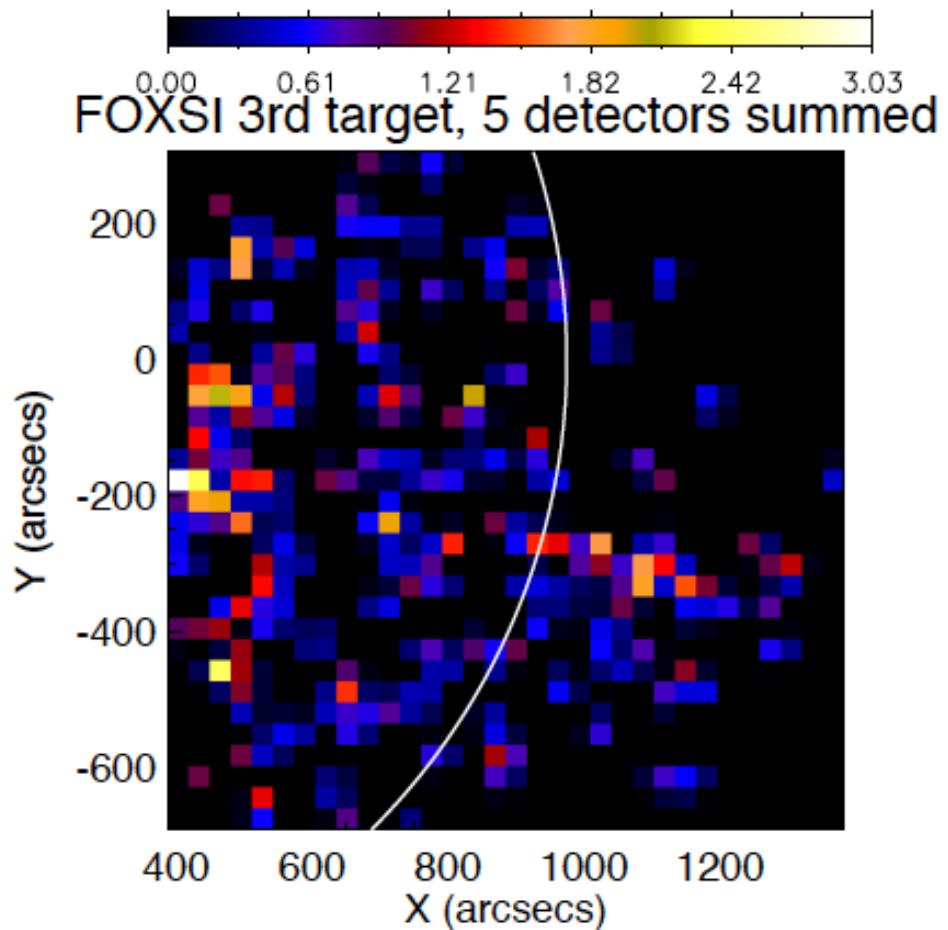

NuSTAR

Does FOXSI also see it?

- Hint of something at the limb, but not all detectors agree.
- Flux on the disk? Maybe. (But be careful about ghost rays...)

Spectra
