

# FOXSI-2 flight summary

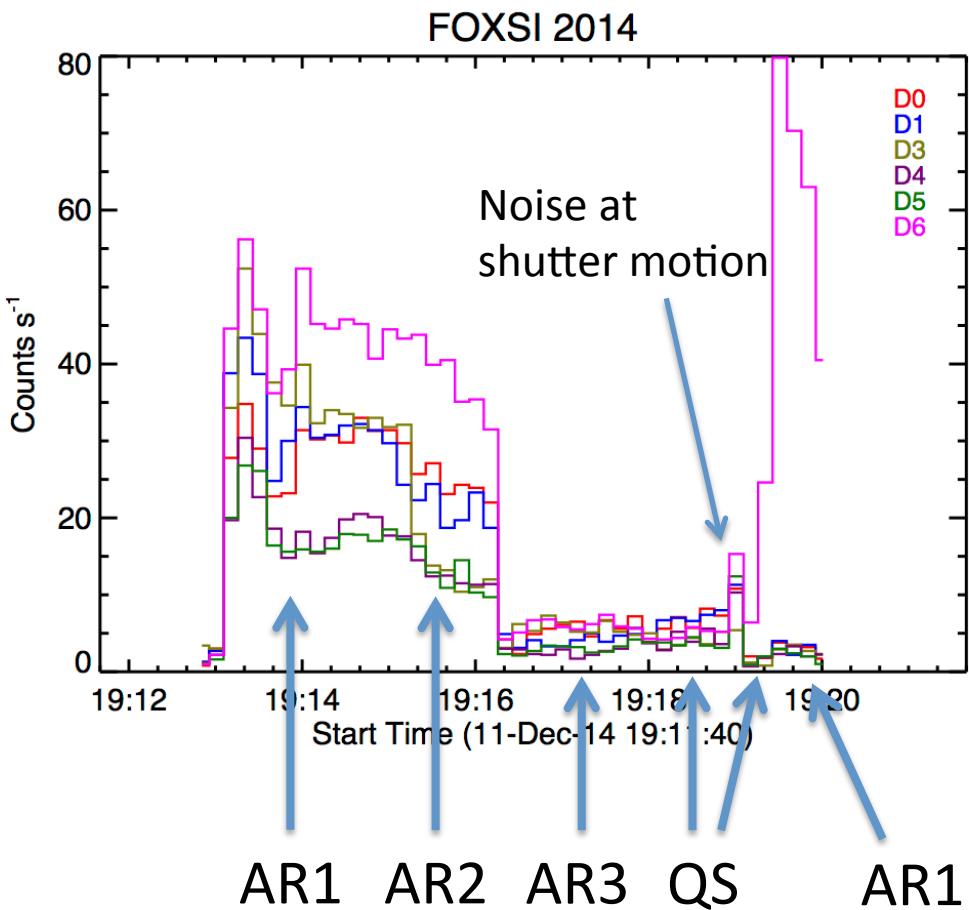

2014-Dec-22

# Pointing plan

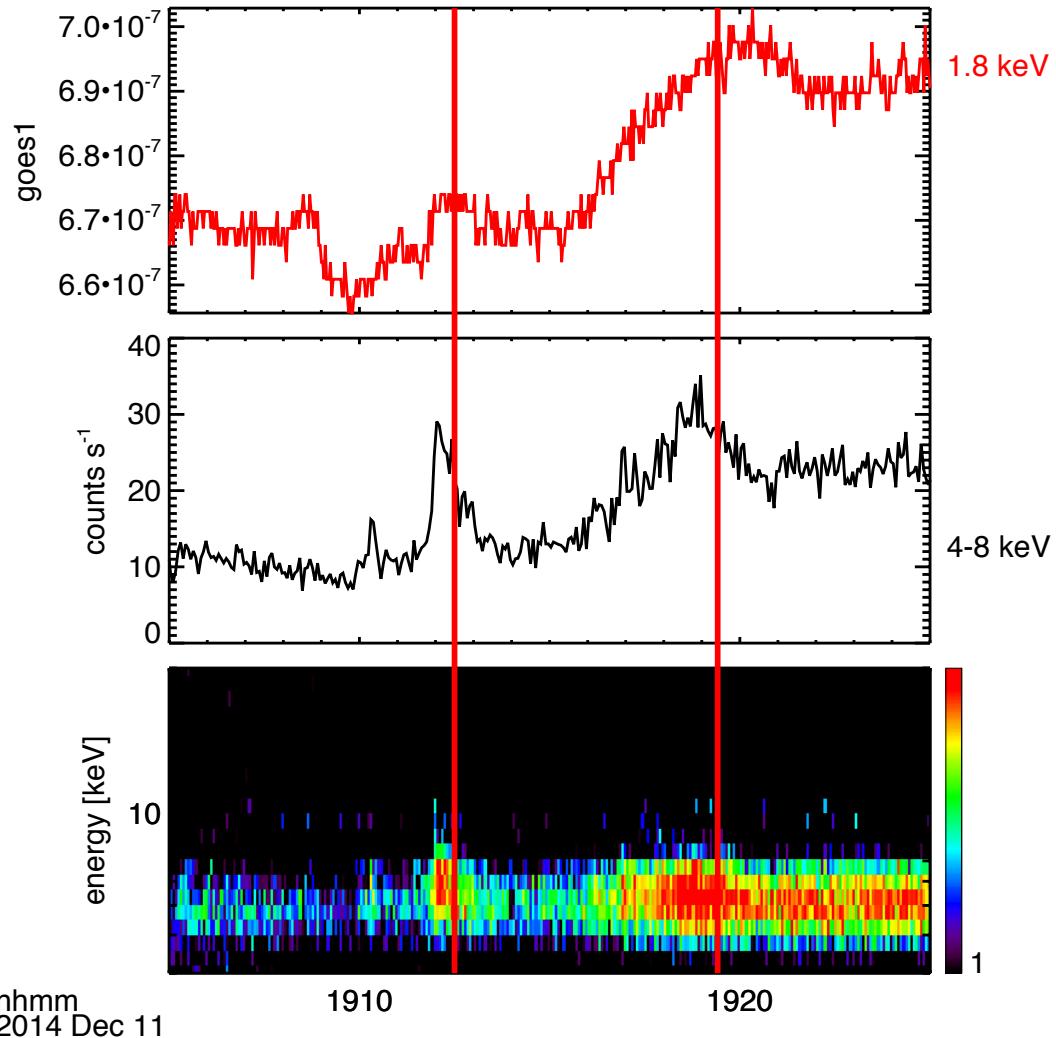

- Sequence (20-100 sec on each):
  - AR1
  - AR2
  - AR3
  - QS1
  - QS1 (shutter in)
  - AR1 (shutter in)

# FOXSI time profile

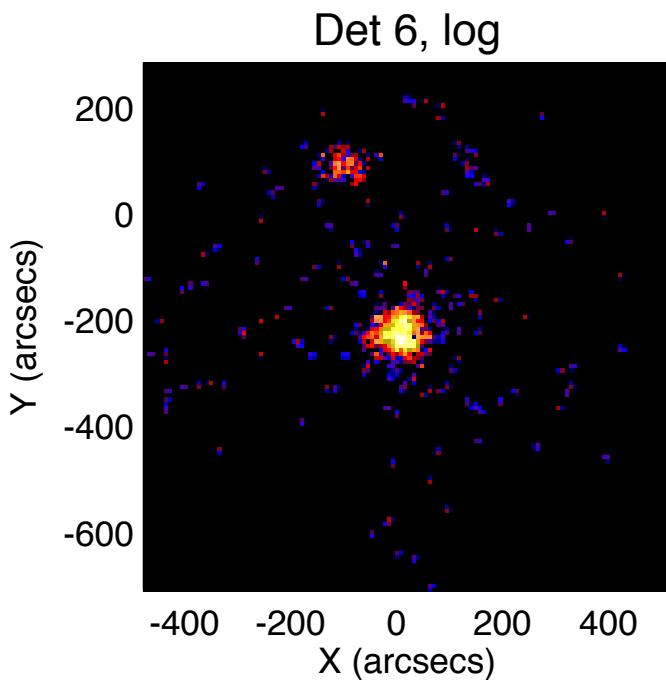

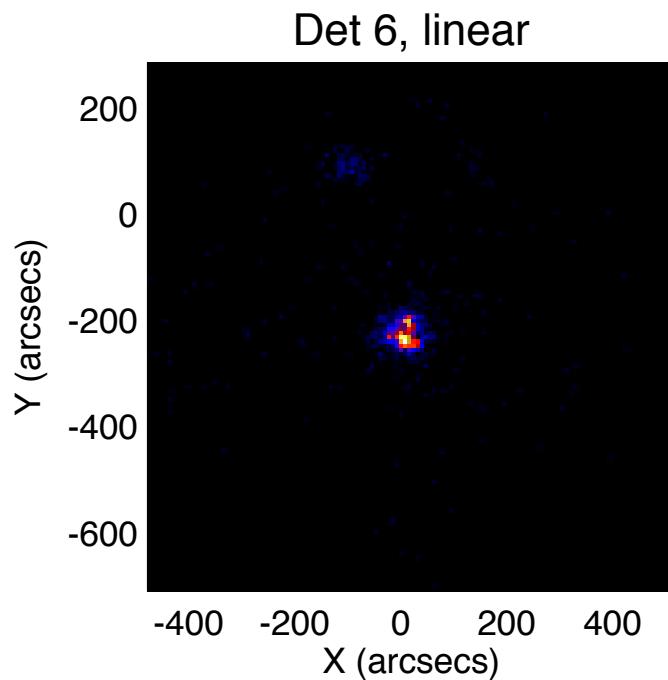

- Raw data; little/no processing done yet (no energy calibration).
- D6 has greater area (3 more shells) and no attenuator.

# RHESSI time profile

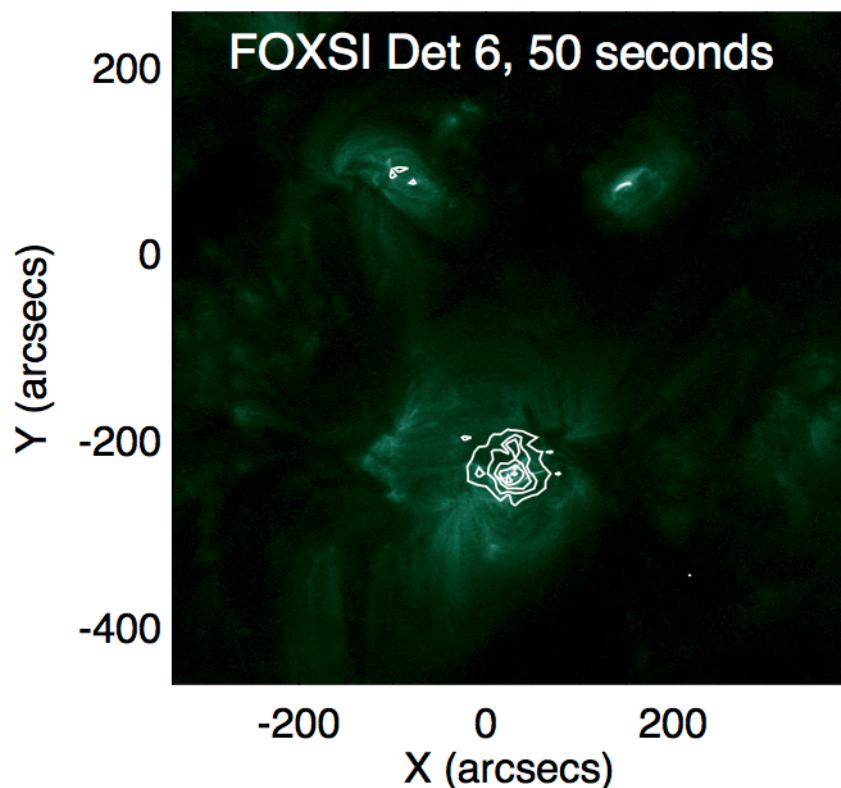

# FOXSI images, AR1

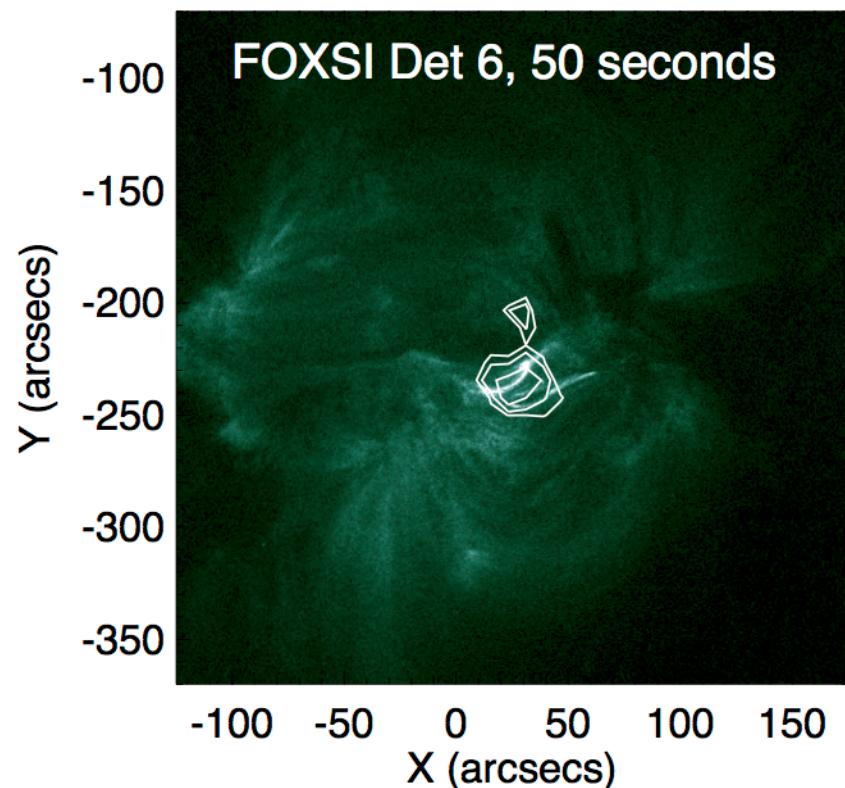

# AR1, with AIA 94A

- Sources are lined up by eye.

AIA 94 11-Dec-2014 19:13:01.120

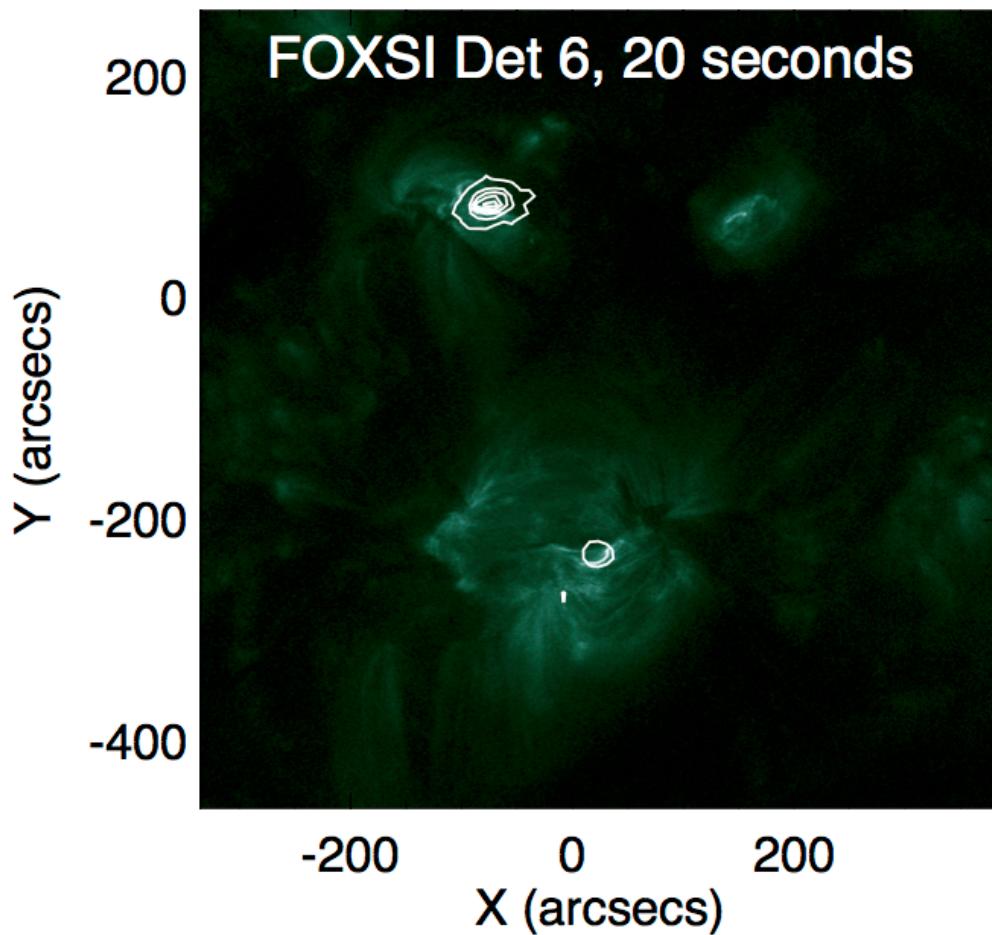

AIA 94 11-Dec-2014 19:13:01.120 UT

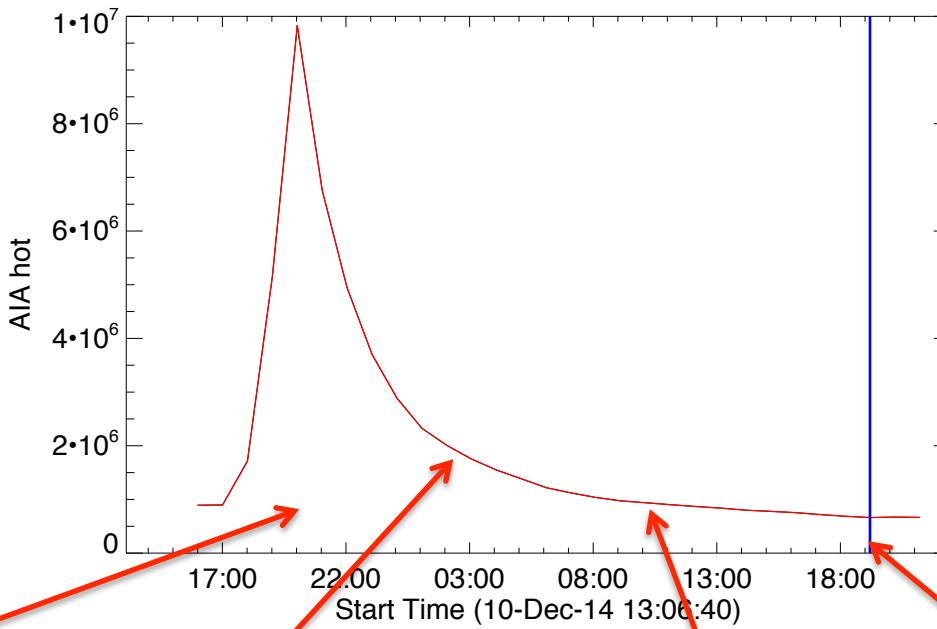

- Note the angry monkey face.

# Last target, with AIA 94

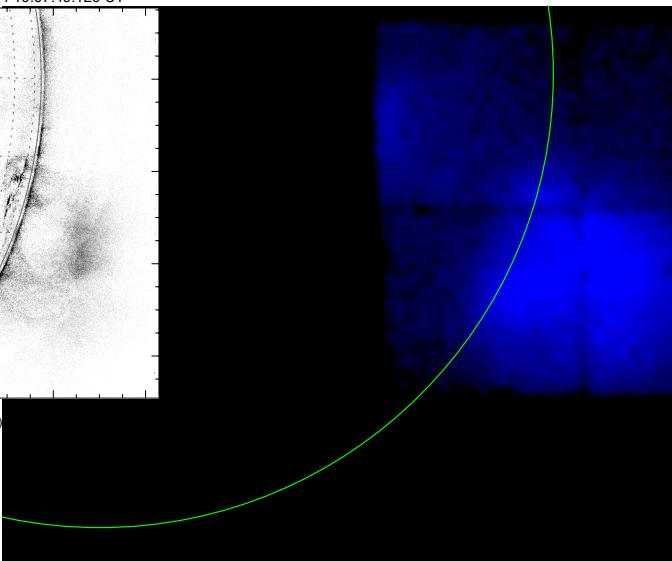

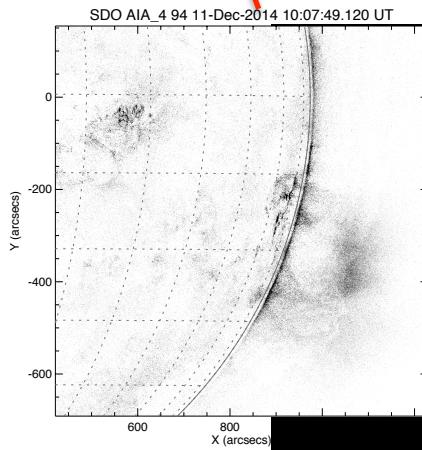

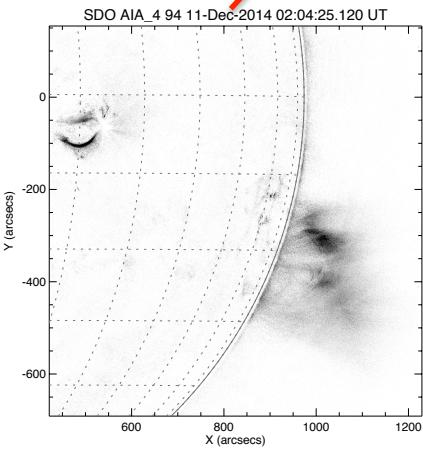

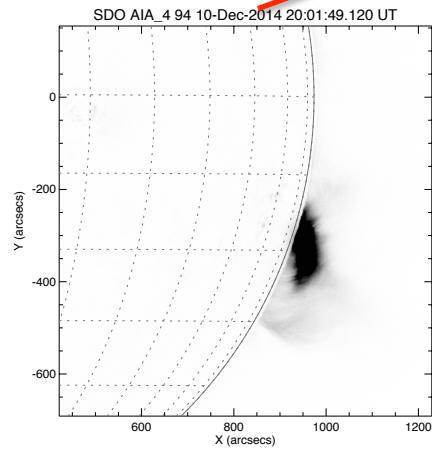

AIA 94 11-Dec-2014 19:19:01.120 UT

# Decaying limb flare and NuSTAR/FOXSI observations

NuSTAR

# Does FOXSI also see it?

- Hint of something at the limb, but not all detectors agree.
- Flux on the disk? Maybe. (But be careful about ghost rays...)
